SUMMARY

Certified Salesforce Architect with 8+ years delivering enterprise CRM for global clients including Jefferies (investment banking) and Apple. Architected a Fund management platform and the in-house replacement of a legacy managed package for Jefferies bankers, covering meetings, call reports, client coverage, deal-related data and Private Capital Advisory workflows. Strong in Apex, Lightning Web Components, Flow, Experience Cloud, Data Cloud, Agentforce and integrations (REST/SOAP, MuleSoft, Platform Events, CDC). Leads Agile teams end to end at 95% client satisfaction. Built an Agentforce Employee Agent that helps Jefferies bankers capture deals, plus Agentforce proofs of concept automating case handling with Flow. Builds AI-powered developer tooling (ApexDebugger) and applies Claude, GitHub Copilot and Cursor across the development lifecycle to automate code review and accelerate delivery.

SKILLS

Core Platform: Apex, Visualforce, Lightning Web Components, Aura Components, SOQL, SOSL, Triggers, Batch/Queueable/Async Apex

Automation: Flow, Process Builder, Approval Process, Salesforce Email Services

Clouds: Sales Cloud, Service Cloud, Experience Cloud, Manufacturing Cloud, Data Cloud

Integration & Data: REST/SOAP APIs, MuleSoft, Platform Events, Change Data Capture, External Services, OmniStudio, ETL, Data Harmonization, PL/SQL

Security & Architecture: Sharing & Visibility, Field-Level Security, OAuth, Territory Management, Solution Architecture, Technical Design

Agentforce & AI: Agent Builder, Autonomous Agent Configuration, Employee Agent, Atlas Reasoning, Case Automation (Agentforce + Flow), Generative AI, LLM-based Code Review

AI & Dev Tools: Python, LangChain, LangGraph, CrewAI, Claude, OpenAI, Cursor, GitHub Copilot, Antigravity, Git/GitHub

Domain: Investment Banking, Private Capital Advisory, Fund Management, Client Coverage, Meeting and Call Reports, Compliance

Testing & Delivery: JEST, Apex Testing, Reports & Dashboards, Agile/Scrum, Stakeholder Management

WORK HISTORY

Lead Technology Specialist

Jun 2025 – Present

Synechron Technologies, Pune, India (Client: Jefferies, Investment Banking)

- Led decommissioning of a legacy managed package (T1Deco) and architected its in-house Salesforce replacement covering meeting notes, call reports, and opportunity and client sharing, eliminating a costly third-party dependency and saving the client millions of dollars.
- Led a team building a Fund management application from the ground up for investment bankers, including Private Capital Advisory, integrating Fund, Asset, Pricing, Performance and Investor data from a third-party system through a data harmonization layer.
- Designed floating notes that let bankers annotate Fund records without leaving their current page or workspace, and built sync logic keeping internal and external Fund data consistent.
- Built multi-source visualizations combining third-party and internal Fund data into graphs bankers use directly in their workspace.
- Built an Agentforce Employee Agent that helps bankers capture deals, which bankers found useful in their day-to-day work.
- Developed Salesforce Email Services automating 500+ inbound requests monthly, reducing manual intervention by 40% and improving response time by 30%.
- Specified Salesforce solutions aligned with business needs and budget, and presented technical designs and requirements to business and technology stakeholders.

Technical Consultant Mar 2022 – Jun 2025

Salesforce India Pvt. Ltd. (Client: Apple), Pune, Maharashtra

- Migrated Opportunity Management from legacy CRM to Salesforce, reducing data processing time by 40% and boosting sales productivity by 25%.
- Automated processes using Flows and Triggers, cutting manual tasks by 50% and improving user adoption by 30%.
- Developed reusable Lightning Web Components with JEST testing, shortening development cycles by 20% for 70+ users.
- Integrated Salesforce with Conga and Box using Change Data Capture and Platform Events, improving data sync efficiency by 60%.
- Led POCs for Rebate Management and Data Processing Engines, improving scalability by 15%.
- Built Agentforce proofs of concept for case automation, using Flow to automate case handling.
- Architected technical designs for Agile projects, delivering zero-defect releases within 10% tighter timelines.
- Delivered client training and demos on Sales Cloud and Einstein Analytics, increasing adoption by 35%.
- Served as SME for cross-functional teams, resolving 95% of technical issues within 24 hours.

System Engineer Feb 2021 – Feb 2022

Great Software Laboratory, Pune, Maharashtra

- Directed Experience Cloud projects, delivering tailored community portals for 10+ clients.
- Developed an LWC-based admissions portal automating enrollment and payments, saving 15 hours weekly.
- Built a Trailhead-inspired portal using LWCs and batch classes, improving badge sorting accuracy by 30% and user engagement by 40%.
- Engineered a case management portal with LWCs, automated notifications and escalation rules, reducing case resolution time by 25%.
- Implemented Queueable classes for outbound communications, improving system efficiency by 20%.
- Customized Service Console with macros, quick actions and dynamic layouts; integrated Knowledge Base and Chatbot to reduce inbound case volume.

System Engineer Jul 2018 – Feb 2021

Tata Consultancy Services, Mumbai, Maharashtra

- Built a Loan Management System for 10,000+ users, with lead generation and approval workflows that reduced loan cycle time by 30%.
- Automated disbursement and collection processes, improving financial operations efficiency by 25%.
- Migrated large-scale data using PL/SQL with 100% data integrity for 5+ clients.
- Optimized Siebel CRM queries (35% faster) and integrated Siebel with external systems via XML and EAI, improving data flow by 40%.
- Collaborated with stakeholders to deliver tailored solutions at 95% client satisfaction; resolved 90% of technical issues within 24 hours.

PROJECTS

ApexDebugger (Self Project) github.com/Ashish001Singh/ApexDebugger

Hybrid AI code reviewer for Salesforce Apex and Lightning Web Components | Python, LangGraph

- Built a hybrid AI code reviewer pairing a deterministic rules engine with an LLM reasoning layer, reviewing Apex and Lightning Web Components; published on GitHub.
- Combined RAG, multi-pass LLM review and F1-gated evaluation harnesses to measure and gate review quality.
- Encoded Apex code review expertise as labeled golden evaluation sets.

EDUCATION

Academy of Technology, Kolkata, West Bengal · May 2018

Bachelor of Engineering (B.Tech), Electronics and Communication | GPA 8.56

Hind Motor High School, Hind Motor, West Bengal

Higher Secondary (Science), May 2014 | 72.2%
